

KingPepe - Whitepaper

Introduction

KingPepe isnt just another coin its the spirit of a cheeky frog riding the blockchain wave!

Were not reinventing the wheel were putting a crown on it and mining it with Bitcoins own SHA-256 power.

The Vision

Weve combined:

- Bitcoin-level strength via a native SHA-256 chain
- The charm of Pepe the Frog, the internets beloved meme
- Real mining to keep the network secure and alive

The result? KingPepe (KPEPE) the first frog that mines blocks with a smile.

What Makes KingPepe Unique?

- First meme coin built on the original SHA-256 chain
- No smart contract headaches just pure blockchain power
- Backed by a fun-loving, loyal community
- Strong support from real miners to power the network
- Natural, organic growth no artificial hype
- Theres only one king on the chain... and it's the frog!

Mining is the Heartbeat

KingPepe uses SHA-256, just like Bitcoin. That means it can be mined with existing ASIC miners, ensuring real decentralization.

We made mining fun again by putting the frog into it literally! Now every block comes with a laugh.

Halving Schedule

Stage	Block Range	Block Reward	Status
-------	-------------	--------------	--------

Launch Phase 0	209,999	50 KPEPE	(Current)
----------------	---------	----------	-----------

Halving #1	210,000	25 KPEPE	(Pending)
------------	---------	----------	-----------

Halving #2	420,000	12.5 KPEPE	(Pending)
------------	---------	------------	-----------

... ..

Final Reward Last Block 0 KPEPE (Future)

Target Market

We aim to reach:

- Fans of Pepe the Frog and meme culture
- Crypto users who value real proof-of-work mining
- Miners looking to support new SHA-256 networks
- Communities that love fun, laughter, and decentralization

Confirmed Partnerships

Official mining pool support (real miners keeping the chain alive):

Visit: miningpoolstats.stream/kingpepe

Future Collaborations (To Be Confirmed)

- Centralized exchange (CEX) listings
- Pepe-style NFT partnerships
- Meme-themed mobile wallets & apps
- GameFi or frog-themed crypto games

Team Strength & Advantages

- Real blockchain experience with SHA-256 networks
- Built by seasoned miners, not just marketers
- Dedicated to decentralization, transparency, and fun
- A unique brand that resonates with meme lovers and miners alike

Frogmap The KingPepe Meme Roadmap

- The Beginning: Network launch and Genesis Block creation (Completed)
- The First Jump: Launch of the first official mining pool (Completed)
- First Croak: Building our Twitter and Telegram communities (Completed)
- Surprise?: Maybe NFTs, maybe a CEX, maybe the moon? (Unknown)
- Frog Wallet: A fun, animated frog wallet app (Coming Soon)
- Meme Madness: We dont know... Its Pepe chaos is guaranteed (Undefined)
